

Hello!

My name is Alex Mathias who I have just received my form two national results. They were good although my main target was to get Div 1.7-9 but because of my laziness I got Div 1.15 and the reason which made me to get F in maths is that I was not serious with my studies in maths subject because I used to fail most of the time which made me to give up in Basic Mathematics subjects. I got disappointing results in physics, Chemistry and Geography because they are always challenging to me. But from above I would like to thank the Bethany Supporters for supporting us since when we started our primary level to secondary level, The Bethany leadership and the Bethany Care workers who encouraged us to study very hard and achieve what we have achieved but also my family members who have been praying for us since we started our secondary level. I promise that I will make changes in my form four national results. My the God be with you all and I thank for your great support for us
